# Nu Html Checker

This tool is an ongoing experiment in better HTML checking, and its behavior remains subject to change

Showing results for FeupShare_index_unauthenticated.htm

Checker Input

Show ☑ source ☑ outline ☑ image report   Options...

Check by file upload ∨   Browse... No file selected.

Uploaded files with .xhtml or .xht extensions are parsed using the XML parser.

Check

Use the Message Filtering button below to hide/show particular messages, and to see total counts of errors and warnings.

Message Filtering

1. **Error** **A document must not include both a** `meta` **element with an** `http-equiv` **attribute whose value is** `content-type` **, and a** `meta` **element with a** `charset` **attribute.**

   From line 4, column 5; to line 4, column 26

   `F-8">↵    <meta charset="utf-8">↵    <`

2. **Error** **Element** `style` **not allowed as child of element** `div` **in this context. (Suppressing further errors from this subtree.)**

   From line 98, column 1; to line 98, column 7

   `>↵</nav>↵↵<style>↵@medi`

   Contexts in which element `style` may be used:
       Where metadata content is expected.
       In a `noscript` element that is a child of a `head` element.
   Content model for element `div`:
       If the element is a child of a `dl` element: one or more `dt` elements followed by one or more `dd` elements, optionally intermixed with script-supporting elements.
       If the element is not a child of a `dl` element: flow content.

Document checking completed.

Image report

No images in the document.
